Devanshi Saxena

Entry-level Data Analyst
devanshisaxena136@gmail.com | 9081012221 | linkedin.com/in/devanshi-saxena-748888319

PROFESSIONAL SUMMARY

Data Analyst enthusiast with hands-on experience in data cleaning, analysis, and predictive modeling demonstrated through a PCOD/PCOS detection project and Insightify. Skilled in Python, SQL, Excel, and data visualization, with the ability to extract patterns and insights from complex datasets. I am seeking an entry-level role to contribute to data-driven decision making and continue building practical analytics experience.

SKILLS

- **Technical Skills**: Python (Pandas, NumPy), SQL (MySQL), Data Visualization (Matplotlib, Seaborn), Excel, JAVA (basics)
- **Soft Skills**: Time Management, Leadership, Team Collaboration, Communication, Adaptability

PROJECTS

Insightify (Python, NLP, Pandas, Matplotlib, Text Analysis)

- Converted unstructured long textual data into actionable insights through analysis, summarization, and visualization techniques to support decision-making.
- Performed text preprocessing and abstraction to improve data quality for accurate analysis
- Designed visual outputs such as word clouds and frequency charts to communicate insights effectively

PCOD/PCOS Detection Project (Python, Logistic Regression)

- Collected and cleaned datasets, handling missing and inconsistent data
- Performed EDA using Pandas and NumPy
- Identified key factors contributing to PCOS risk (e.g., BMI, lifestyle patterns) and developed a predictive model using **Logistic Regression** to assist early detection, potentially supporting preventive healthcare decisions.
- Visualized insights through Matplotlib

EDUCATION

Bachelor of Engineering in Computer Engineering, GTU, SVIT Vasad, 2027, CGPA: 9.13

HSC (12th), New Era Senior Secondary School, Vadodara, 2023 – 90%

SSC (10th), New Era Senior Secondary School, Vadodara, 2021 – 94.6%

CERTIFICATIONS

- **Foundation Course** in **Python Programming, Data Analysis with Python, AI – Code Unnati Program, Edunet Foundation (by SAP),** 2024-2025
  Covered Python fundamentals, Data analysis techniques, and introductory AI concepts

INTERNSHIPS

Data Analyst Intern, Parul Chemicals, August 2025 – November 2025

- Derived actionable insights from dashboards that guided management in refining product mix, strengthening presence in low-performing districts, and improving salesforce efficiency—supporting business growth and sales recovery
- Cleaned and validated small-scale data to improve data accuracy and consistency
- Documented project activities, data flow, and task updates

- Worked wwith n8n automation workflows and Power BI dashboards for data reporting and visualization

ACHIEVEMENTS

- **Training and Placement (TnP) Coordinator**, 2024-2027, SVIT Vasad – Organized and delivered in seminars, coordinated placement drives, and facilitated student-industry interaction.
- Participated in **Solution Challenge**, Google Developer Groups on Campus.
- Participated in **MeciaHacks 2.0**, 2024 – Developed a virtual waiting room as a part of a healthcare optimization platform.
