Devanshi Saxena

Entry-level Data Analyst
devanshisaxena136@gmail.com | 9081012221 | linkedin.com/in/devanshi-saxena-748888319

PROFESSIONAL SUMMARY

Aspiring Data Analyst with hands-on experience in data cleaning, analysis, and predictive modeling demonstrated through a PCOD/PCOS detection project. Skilled in Python, SQL, Excel, and data visualization, with the ability to extract patterns and insights from complex datasets. I am seeking an entry-level role to contribute to data-driven decision making and continue building practical analytics experience.

SKILLS

- **Technical Skills**: Python (Pandas, NumPy), SQL (MySQL), Data Visualization (Matplotlib, Seaborn)
- **Non-Technical Skills**: Problem solving, Time Management, Leadership, Team Management, Communication

PROJECTS

PCOD/PCOS Detection Project (Python, Logistic Regression)

- Collected and cleaned datasets, handling missing and inconsistent data
- Performed EDA using Pandas and NumPy
- Built a machine learning model using **Logistic Regression**, achieving **91% accuracy**
- Visualized insights through Matplotlib

EDUCATION

Bachelor of Engineering in Computer Engineering, SVIT Vasad, 2027, CPI: 8.85/10

HSC (12th), New Era Senior Secondary School, Vadodara, 2023 – 90%

SSC (10th), New Era Senior Secondary School, Vadodara, 2021 – 94.6%

CERTIFICATIONS

- **Foundation Course** in **Python Programming, Data Analysis with Python, AI – Code Unnati Program, Edunet Foundation (by SAP),** 2024-2025

INTERNSHIPS

Data Analyst Intern, Parul Chemicals, August 2025 – November 2025

- Cleaned and validated small-scale data to improve data accuracy and consistency
- Documented project activities, data flow, and task updates
- Gained hands-on exposure to n8n automation workflows and Power BI dashboards.

ACHIEVEMENTS

- **Training and Placement (TnP) Coordinator**, 2022-2027, SVIT Vasad – Organized seminars, coordinated placement drives, and facilitated student-industry interaction.
- Participated in **Solution Challenge**, Google Developer Groups on Campus.
- Participated in **MeciaHacks 2.0**, 2024 – Developed a virtual healthcare optimization platform.
